

**MyClass.java**

```
1 public class MyClass {  
2     public static void main(String[] args) {  
3         int myArray[] = new int[7];  
4  
5         try {  
6             System.out.println(myArray[9]);  
7  
8         } catch (ArrayIndexOutOfBoundsException e) {  
9             // TODO: handle exception  
10            System.out.println("The element 9 does not exist!");  
11  
12        }  
13    }  
14 }
```
