

Question 4 E-commerce Order\Item.java

```
1  class Item {
2      private int id;
3      private String name;
4      private double price;
5
6      // Constructor
7      public Item(int id, String name, double price) {
8          this.id = id;
9          this.name = name;
10         this.price = price;
11     }
12
13     // Getters and setters
14     public int getId() {
15         return id;
16     }
17
18     public void setId(int id) {
19         this.id = id;
20     }
21
22     public String getName() {
23         return name;
24     }
25
26     public void setName(String name) {
27         this.name = name;
28     }
29
30     public double getPrice() {
31         return price;
32     }
33
34     public void setPrice(double price) {
35         this.price = price;
36     }
37 }
38
```
