

## Question\_1\Question\_1.java

```
1  package Question_1;
2
3  import javax.swing.*;
4
5  public class Question_1 {
6      public static void main(String[] args) {
7
8          // create a JFrame
9          JFrame frame = new JFrame("JOptionPane showMessageDialog and showInputDialog");
10
11         String name = JOptionPane.showInputDialog(frame,
12             "What is your name?",
13             "Input",
14             JOptionPane.QUESTION_MESSAGE);
15
16         JOptionPane.showMessageDialog(frame,
17             "Welcome, " + name + ", to Java Programming!",
18             "Message",
19             JOptionPane.INFORMATION_MESSAGE);
20     }
21 }
```
